## Kerotest/Marsh N Series Needle Valves Hard Seat, Alloy Steel

## Product Brief

An economical valve for regulating pressures up to 10,000 psi. Suitable for air, water, oil and other fluids with low-level corrosiveness. Kerotest/Marsh "N" Series Needle Valves are used in processing plants, oil and gas production, hydraulic and pneumatic equipment, testing labsanywhere the flow of fluid must be carefully regulated.

## Features/Benefits

■ Maximum operating pressure: $10,000 \mathrm{psi}(70,000 \mathrm{kPa})$.
■ Minimum burst pressure: $20,000 \mathrm{psi}(140,000 \mathrm{kPa})$.

- Temperature limits: $-20^{\circ}$ to $800^{\circ} \mathrm{F}$ $\left(-28^{\circ}\right.$ to $426^{\circ} \mathrm{C}$ ) for Grafiflex ${ }^{\circledR}$ packed valves, $500^{\circ} \mathrm{F}$ for Teflon ${ }^{\circledR}$ packed valves.
$\square$ Flow coefficients ( $C_{V}$ ): See part number table.
■ Body and bonnet material: AISI 1045 alloy steel.
■ Stem material: 416 stainless steel, hardened.

■ Packing: Teflon, Grafiflex (optional).
■ Handle: Two-prong. Cast aluminum for $1 / 8 "$ through $1 / 2^{\prime \prime}$ sizes. Malleable iron for $3 / 4 "$ and $1^{1 "}$ sizes.
■ Connection: National Pipe Thread, meeting specifications of Federal Standard H-28.
■ Finish: Clear zinc plating.
■ Assembly: Bonnet on all globe valves $1 / 2^{\prime \prime}$ and under is threaded into body and staked to prevent turning. Body and insert for angle valves fused into single unit by a welding process.
